

rheology theory and applications pdf

Scope. In practice, rheology is principally concerned with extending continuum mechanics to characterize flow of materials, that exhibits a combination of elastic, viscous and plastic behavior by properly combining elasticity and fluid mechanics.

A Phd student position is available on the rheology of nanocellulose suspensions and composites. The work will address (i) structure-property correlations in the framework of surface treated cellulose nanocrystals and (ii) seek out a fundamental understanding leading towards processing applications.
