Main focus of GENE QUANTIFICATION web page is to describe and summarize all technical aspects involved in quantitative gene expression analysis using real-time RT-PCR and competitive RT-PCR. It illustrates the usefulness of absolute and relative quantification assays in real-time PCR and real-time RT-PCR.

The paper reviews the application of deterministic-stochastic models in some areas of computational electromagnetics. Namely, in certain problems there is an uncertainty in the input data set as some properties of a system are partly or entirely unknown. Thus, a simple stochastic collocation (SC) method is used to determine relevant statistics ...
